

# **CLASS 800 & 1500 BALL VALVE FIGURE NUMBERING SYSTEM**

#### **A BRIEF HISTORY**

**1984** EMICO (Eayuan Metal Industrial Co. Ltd.) was incorporated at Lugang, Changhua (Taiwan) and began establishing itself as a professional ball valve manufacturer for the oil, petrochemical, natural gas, on-shore plants and water & processing markets.

**2000** EMICO opened a second facility in Lugang to meet demands of the company's growth and increase its manufacturing capacity.

**2002** EMICO set up its third manufacturing facility in Shanghai for the production of gate, globe & check valves in collaboration with Hitachi, Japan.

**2005** EMICO started a joint venture with Huzhou Heyuanfeng Cast Steel Co. to produce castings in China.

**2007** EMICO combined both its manufacturing facilities in Changbin Industrial Park in Lugang and invested in state-of-the-art machining centres to further expand its production

capacity in order to meet growing demands of its international clientele.

**2008** EMICO added a new production facility in Shanghai to service the needs of its China market.

# **PRODUCTION RANGE**

- EMICO ball valves are made by investment casting (lost wax process) from size 1/4" up to 4" and sand shell casting or stack shell casting from 4" to 12". High pressure classes are supplied in forged construction.
- Ball valves are supplied in various configurations: 1-piece, 2-piece & 3-piece with threaded, socket weld, butt weld and flanged ends.
- Standard materials offered are 316 stainless steel and carbon steel in WCB or A105 to applicable ASTM standards. Other materials introduced to the supply range are Alloy 20/CN7M, Hastelloy C, Duplex and Super Duplex.
- EMICO also supplies full port PFA lined ball valves for corrosive applications.
- EMICO's product range includes Oil Field valves and Sanitary valves.
- Class ratings: Class 150, Class 300, Class 800, Class 1500 and Class 2500.

#### **QUALITY ASSURANCE & CERTIFICATION**

- EMICO was the first ball valve manufacturer in Taiwan to implement the ISO 9002 Quality Assurance System. In 2000, it further obtained ISO 9001 Certification, cross-approved with TUV DIN EN ISO 9001.
- EMICO is an authorised licensee to use API 6D and certified to PED, CE, ATEX, TU-Luft and is UL listed.
- EMICO is certified to Australian Gas Association (AGA) AG-214 for its range of EA-305 3-piece fire safe ball valves.
- Fire safe designs include: 1-pc EA-108, 2-pc EA-25A, 3-pc EA-305, EA-309, EA-310 & P-135. These valves are fire safe to API 607 4th & 5th edition fire test requirements and tested and certified by Southwest Research Institute (SwRI) in Texas, USA and TU-Luft.
- EMICO has an established Engineering Department of engineers, technicians and an R&D centre with many years experience in the manufacture of quality ball valves.
- All valves are fully traceable and certified to EN 10204-2004 3.1 (chemical, mechanical, hydrostatic & pneumatic pressure tests) and can be supplied with NDE performed to ASME B16.34 international standards. Valves are tested and certified to API 598.

# **TECHNICAL FEATURES**

# EMICO 3-piece bolted body ball valves in Carbon Steel and Stainless Steel - Classes 800 & 1500, NPT & SW ends

Full compliance with EN 12516 & ASME/ANSI B16.34 for Class 800 and ASME/ANSI B16.34 for Class 1500 with PEEK seats  REPAIR KITS  Comprising seats, body seals, O-ring, gland packing and thrust washer  FIRE SAFE  Certified to API 607 Ed. 4 (Class 800) and Ed. 5 (Class 1500)  ENCLOSED BOLTING  Maximum resistance to fire conditions. Improved appearance and maximum body compression  NACE MR-01-75  Suitable for sour service  BODY CLOSURE / STEM SEAL  Perfect sealing is guaranteed by a double barrier between body/closure and stem seal for Class 1500 and stem seal only for Class 800  FULL PORT FOR CLASS 800  No pressure drop  ANTI-STATIC PLUNGER  Positive earthing of ball and stem to valve body prevents static electricity build-up in ball  BLOWOUT-PROOF STEM  Internally fitted back-seated stem provides anti-blowout function under pressure  BELLEVILLE WASHERS ON STEM  Live loaded gland packing for long cycle life  END CONNECTION OPTIONS  NPT, socket weld or pup extensions  HEAT NUMBERED  Fully certified and traceable  SIZE RANGE  15mm through 50mm  PRESSURE RELIEF  Internal pressure equalising vent (ball drilled with upstream pressure relief vent hole) can be supplied for certain applications (ammonia, chlorine, etc.) Heating of trapped media in body cavity can cause pressure rise, permanently distorting seats or ball  LOCKING MECHANISM  Lock open / Lock closed positions  ACTUATION OPTIONS  Spring-close and double-acting actuated valves on request		
FIRE SAFE  Certified to API 607 Ed. 4 (Class 800) and Ed. 5 (Class 1500)  ENCLOSED BOLTING  Maximum resistance to fire conditions. Improved appearance and maximum body compression  NACE MR-01-75  Suitable for sour service  BODY CLOSURE / STEM SEAL  Perfect sealing is guaranteed by a double barrier between body/closure and stem seal for Class 1500 and stem seal only for Class 800  FULL PORT FOR CLASS 800  No pressure drop  ANTI-STATIC PLUNGER  Positive earthing of ball and stem to valve body prevents static electricity build-up in ball  BLOWOUT-PROOF STEM  Internally fitted back-seated stem provides anti-blowout function under pressure  BELLEVILLE WASHERS ON STEM  Live loaded gland packing for long cycle life  END CONNECTION OPTIONS  NPT, socket weld or pup extensions  HEAT NUMBERED  Fully certified and traceable  SIZE RANGE  15mm through 50mm  PRESSURE RELIEF  Internal pressure equalising vent (ball drilled with upstream pressure relief vent hole) can be supplied for certain applications (ammonia, chlorine, etc.) Heating of trapped media in body cavity can cause pressure rise, permanently distorting seats or ball  LOCKING MECHANISM  Lock open / Lock closed positions	CAST & FORGED BODY & ENDS	·
ENCLOSED BOLTING  Maximum resistance to fire conditions. Improved appearance and maximum body compression  NACE MR-01-75  Suitable for sour service  BODY CLOSURE / STEM SEAL  Perfect sealing is guaranteed by a double barrier between body/closure and stem seal for Class 1500 and stem seal only for Class 800  FULL PORT FOR CLASS 800  No pressure drop  ANTI-STATIC PLUNGER  Positive earthing of ball and stem to valve body prevents static electricity build-up in ball  BLOWOUT-PROOF STEM  Internally fitted back-seated stem provides anti-blowout function under pressure  BELLEVILLE WASHERS ON STEM  Live loaded gland packing for long cycle life  END CONNECTION OPTIONS  NPT, socket weld or pup extensions  HEAT NUMBERED  Fully certified and traceable  SIZE RANGE  15mm through 50mm  PRESSURE RELIEF  Internal pressure equalising vent (ball drilled with upstream pressure relief vent hole) can be supplied for certain applications (ammonia, chlorine, etc.) Heating of trapped media in body cavity can cause pressure rise, permanently distorting seats or ball  LOCKING MECHANISM  Lock open / Lock closed positions	REPAIR KITS	Comprising seats, body seals, O-ring, gland packing and thrust washer
NACE MR-01-75  Suitable for sour service  BODY CLOSURE / STEM SEAL  Perfect sealing is guaranteed by a double barrier between body/closure and stem seal for Class 1500 and stem seal only for Class 800  FULL PORT FOR CLASS 800  No pressure drop  ANTI-STATIC PLUNGER  Positive earthing of ball and stem to valve body prevents static electricity build-up in ball  BLOWOUT-PROOF STEM  Internally fitted back-seated stem provides anti-blowout function under pressure  BELLEVILLE WASHERS ON STEM  Live loaded gland packing for long cycle life  END CONNECTION OPTIONS  NPT, socket weld or pup extensions  HEAT NUMBERED  Fully certified and traceable  SIZE RANGE  15mm through 50mm  PRESSURE RELIEF  Internal pressure equalising vent (ball drilled with upstream pressure relief vent hole) can be supplied for certain applications (ammonia, chlorine, etc.) Heating of trapped media in body cavity can cause pressure rise, permanently distorting seats or ball  LOCKING MECHANISM  Lock open / Lock closed positions	FIRE SAFE	Certified to API 607 Ed. 4 (Class 800) and Ed. 5 (Class 1500)
BODY CLOSURE / STEM SEAL  Perfect sealing is guaranteed by a double barrier between body/closure and stem seal for Class 1500 and stem seal only for Class 800  FULL PORT FOR CLASS 800  No pressure drop  ANTI-STATIC PLUNGER  Positive earthing of ball and stem to valve body prevents static electricity build-up in ball  BLOWOUT-PROOF STEM  Internally fitted back-seated stem provides anti-blowout function under pressure  BELLEVILLE WASHERS ON STEM  Live loaded gland packing for long cycle life  END CONNECTION OPTIONS  NPT, socket weld or pup extensions  HEAT NUMBERED  Fully certified and traceable  SIZE RANGE  15mm through 50mm  PRESSURE RELIEF  Internal pressure equalising vent (ball drilled with upstream pressure relief vent hole) can be supplied for certain applications (ammonia, chlorine, etc.) Heating of trapped media in body cavity can cause pressure rise, permanently distorting seats or ball  LOCKING MECHANISM  Lock open / Lock closed positions	ENCLOSED BOLTING	
and stem seal for Class 1500 and stem seal only for Class 800  FULL PORT FOR CLASS 800 No pressure drop  ANTI-STATIC PLUNGER Positive earthing of ball and stem to valve body prevents static electricity build-up in ball  BLOWOUT-PROOF STEM Internally fitted back-seated stem provides anti-blowout function under pressure  BELLEVILLE WASHERS ON STEM Live loaded gland packing for long cycle life  END CONNECTION OPTIONS NPT, socket weld or pup extensions  HEAT NUMBERED Fully certified and traceable  SIZE RANGE 15mm through 50mm  PRESSURE RELIEF Internal pressure equalising vent (ball drilled with upstream pressure relief vent hole) can be supplied for certain applications (ammonia, chlorine, etc.) Heating of trapped media in body cavity can cause pressure rise, permanently distorting seats or ball  LOCKING MECHANISM Lock open / Lock closed positions	NACE MR-01-75	Suitable for sour service
ANTI-STATIC PLUNGER  Positive earthing of ball and stem to valve body prevents static electricity build-up in ball  BLOWOUT-PROOF STEM  Internally fitted back-seated stem provides anti-blowout function under pressure  BELLEVILLE WASHERS ON STEM  Live loaded gland packing for long cycle life  END CONNECTION OPTIONS  NPT, socket weld or pup extensions  HEAT NUMBERED  Fully certified and traceable  SIZE RANGE  15mm through 50mm  PRESSURE RELIEF  Internal pressure equalising vent (ball drilled with upstream pressure relief vent hole) can be supplied for certain applications (ammonia, chlorine, etc.) Heating of trapped media in body cavity can cause pressure rise, permanently distorting seats or ball  LOCKING MECHANISM  Lock open / Lock closed positions	BODY CLOSURE / STEM SEAL

# **DESIGN & INSPECTION STANDARDS**

- Pressure /Temperature Ratings: Body – ASME B16.34 (Class 800 &1500) Seat – As per EMICO charts
- General Valve Design: EN 12516 / ASME B16.34
- Shell Wall Thickness: ASME B16.34
- Construction: Cast & Forged 3-Piece
- Face to Face Dimensions: Manufacturer's Standard, per EMICO Drawings
- End Connections: NPT to ASME B1.20.1, SW to ASME B16.11
- Pressure Test: API 598 (Sealing Bubble Tight Bi-Directional)
- Fire Safe Test: API 607 Ed. 4 / API 607 Ed. 5
- Materials & Test Certification: EN 10204-2004 3.1

# **MATERIALS SELECTION**

BODY:

Carbon Steel, Low Temperature Carbon Steel, Special Alloy, Duplex and Super Duplex, Monel, Inconel, Hastelloy, Titanium, etc.

BALL:

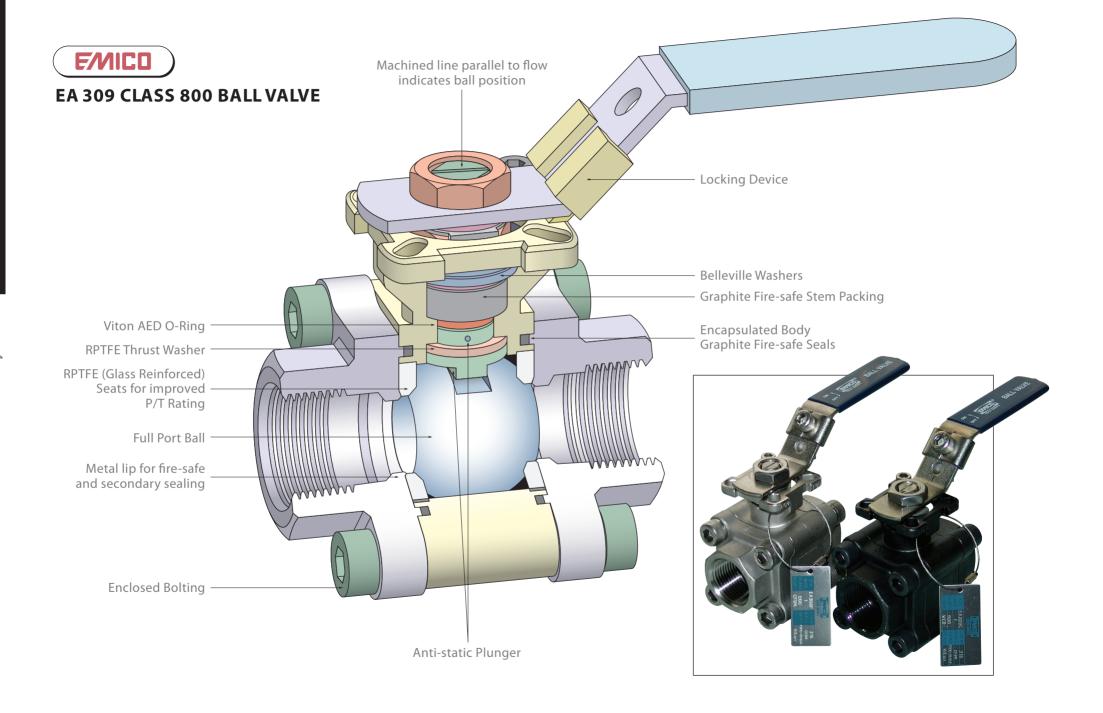

Stainless Steel, Special Alloy, Duplex and Super Duplex, Monel, Inconel, Hastelloy, Titanium, etc.

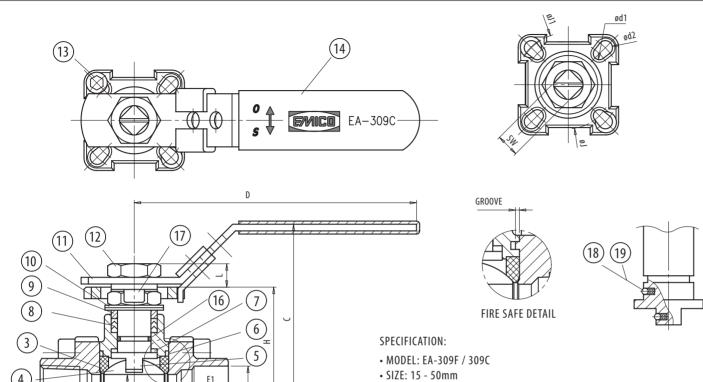

#### **EXTERNAL COATING**

Carbon Steel valves are usually protected with manufacturer's standard paint finish or phosphating. Valves can also be supplied with special paint finish.

#### **ACCESSORIES**

BW, pup and/or transition pieces etc. on request.
